SEPARE

design by SMPDO

Separe

Separe is a sound-absorbing and space-dividing system that allows the creation of zones for meetings, close collaboration, privacy, and focus. It's a modular system that brings structure to open-plan layouts and their interaction processes. The system is ideal for shared spaces like lounge areas, waiting rooms, libraries, coworking areas, and workplaces. It is lightweight and freestanding, suited to build a wide range of configurations, and ready to adjust quickly to changing conditions and preferences.

CONFIGURATION 06

dimensions
w 420 x h142/182 cm

The effective modularity of **Separe** enables linear, curved, angular, and circular compositions built in two heights and various directions - thanks to the three types of connecting profiles with flexible joints. It's available in several pre-designed configurations or as a single building element, so one can design its own configuration to meet specific spatial demands.

The system's personalization is achieved through a wide range of removable fabric covers and colors of connecting profiles. The fabric-covered elements create a feeling of casual comfort and security while effectively absorbing ambient noise. Their soft surface allows them to be used as a pinboard, while small hooks can be placed anywhere along the top edge for additional possibilities.

With all parts separately replaceable, **Separe** has all the ingredients to stay fresh in the long run. It's a sustainable product, entirely produced out of recycled or recyclable materials.

CONFIGURATION 03

dimensions
w 336 x h142/182 cm

Founded in 2013, SMPDO is a Zagreb-based industrial design agency working on various projects ranging from industrial and spatial design to site-specific installations, art direction and design consultancy. Their work has been published in several renowned magazines (Dezeen, Domus, Frame, Hypebeast...) and exhibited worldwide. Theirs designs for Prostoria include the Strain collection, Rhomb collection and the Convert modular system.
